#### **DETAILED ACTION**

1. Claims 2-5 are objected to because of the following informalities: The claims are improperly written. A claim must be of a <u>single</u> sentence. Appropriate correction is required.

2. Claims 2-5 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited. In claim 2, line 4, "the outside", "the binding" and "the plain elastic" lack proper antecedent basis.

In claim 3, "the movement" lacks proper antecedent basis.

## Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 2-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Richards (1,375,176).

Richards disclose a necklace consisting of an elastic band (7) having decorative beads (1) secured to the band, wherein the necklace can inherently perform the function of encircling the book to hold a place within the book since the necklace sets forth the same structural limitations as presently claimed. When the necklace is placed in the book, the beads (1) are capable of being placed outside of the book along the binding and the elastic would be on the inside of the book.

The limitation that the device encircles a book to hold a place within the book sets forth the functional limitation of the device and does not set forth a structural limitation. Claims directed to an apparatus must be distinguished from the prior art in terms of structure rather than function alone. Applicant has failed to claim the book in combination with the device and, therefore, the subcombination of the device alone has been considered.

Regarding claim 3, the beads are strung and centered on the elastic band and knotted (via loops 5) to limit the movement of the beads (as seen in figure 1) and the band is fastened with the hook (12) being inserted into the eye (10). The ends of the elastic being "then knotted together", does not structurally limit the claim. The patentability of a product does not depend on its method of production. Product-by-Process claims are not limited to the manipulations of recited steps, only the structure implied by the steps. (See MPEP 2113)

Regarding claim 4, the beads are decorative and colorful (see page 1, column 1, lines 43-46).

Regarding claim 5, the device remaining in place until you move the elastic in between any other two pages recites the intended use of the device. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

## Response to Arguments

5. Applicant's arguments with respect to claims 2-5 have been considered but are most in view of the new ground(s) of rejection.

### Conclusion

6. This action is a **final rejection** and is intended to close the prosecution of this application. Applicant's reply under 37 CFR 1.113 to this action is limited either to an appeal to the Board of Patent Appeals and Interferences or to an amendment complying with the requirements set forth below.

If applicant should desire to appeal any rejection made by the examiner, a Notice of Appeal must be filed within the period for reply identifying the rejected claim or claims appealed. The Notice of Appeal must be accompanied by the required appeal fee of \$250.00.

If applicant should desire to file an amendment, entry of a proposed amendment after final rejection cannot be made as a matter of right unless it merely cancels claims or complies with a formal requirement made earlier. Amendments touching the merits of the application which otherwise might not be proper may be admitted upon a showing a good and sufficient reasons why they are necessary and why they were not presented earlier.

A reply under 37 CFR 1.113 to a final rejection must include the appeal from, or cancellation of, each rejected claim. The filing of an amendment after final rejection, whether or not it is entered, does not stop the running of the statutory period for reply to the final rejection unless the examiner holds the claims to be in condition for allowance. Accordingly, if a Notice of Appeal has not been filed properly within the period for reply, or any extension of this period obtained under either 37 CFR 1.136(a) or (b), the application will become abandoned.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monica S. Carter whose telephone number is (571) 272-4475. The examiner can normally be reached on Monday-Thursday (6:00 AM - 3:30 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrea L. Wellington can be reached on (571) 272-4483. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
